

At Flex, we welcome people of all backgrounds. Our employees thrive here by living our values: we support each other as we strive to find a better way, we move fast with discipline and purpose, and we do the right thing always. Through a respectful, inclusive and collaborative culture, a career at Flex offers the opportunity to make a difference, invest in your career growth and join our purpose -- to make great products that create value and improve people's lives.

For our site in **Hägglingen (AG)**, we are looking for a **self-motivated, responsible and proactive Maintenance Technician – Injection Molding Equipment & Infrastructure (a)** to join us immediately or by agreement.

In this varied role, your main focus will be on maintaining our injection molding machines and peripheral equipment. At the same time, you will work closely with the Maintenance and Facility teams to support the reliable operation of various site infrastructure and utility systems. You will collaborate across different functions and play an important role in ensuring equipment availability, production reliability and efficient processes.

Maintenance Technician – Injection Molding Equipment & Infrastructure 100% (a)

Here is a glimpse of what you'll do:

- Ensuring the availability, reliability and safe operation of our injection molding machines, peripheral equipment, and selected infrastructure and utility systems
- Performing preventive, condition-based and corrective maintenance activities
- Managing and maintaining the CareOffice maintenance management system
- Troubleshooting and resolving technical issues on injection molding machines, robotic systems, peripheral equipment, and infrastructure systems
- Maintaining temperature control units, drying systems, conveying and dosing systems, cooling water systems, and other production-related equipment
- Supporting the maintenance, servicing and optimization of building systems, including cooling water, compressed air, heating, ventilation, and utility systems
- Performing regular inspections and scheduled maintenance
- Supporting new installations, modifications and optimization of production equipment and infrastructure

- Working closely and collaboratively with Production, Quality Assurance, Engineering, Facility Management, and other specialist departments
- Actively contributing as part of the Maintenance team to ensure reliable and uninterrupted production operations
- Contributing to continuous improvement initiatives aimed at increasing equipment availability and operational reliability
- Complying with internally trained GMP and cleanroom requirements, including hygiene, housekeeping, cleanliness, conduct, work instructions, and logbook documentation
- Documenting all maintenance and servicing activities

Here is some of what you'll need:

- Completed technical vocational training as a **Polymechanic, Production Mechanic, Mechatronics Technician**, or a comparable qualification
- Several years of professional experience in the maintenance of production equipment, ideally in an industrial environment or plastics processing
- Good knowledge of mechanics, pneumatics, and industrial equipment technology
- Basic electrical knowledge is an advantage
- Additional technical qualifications, e.g. **NIV Art. 15**, are an advantage
- Experience working with maintenance management software and technical documentation
- A precise, structured, and independent way of working
- Quick comprehension and a willingness to learn new skills and technologies
- Enjoyment of working in an interdisciplinary team
- High level of commitment and a strong sense of responsibility
- Very good written and spoken German
- Good MS Office skills

We offer you:

- You are guaranteed a detailed induction
- A professional and modern working environment
- Access to personal and professional development
- A competitive salary package / Minimum of 25 vacation days
- Flexible working
- E-Car Chargingstations

We look forward to receiving your application!
